Glynn County Government Launches Mobile Citizen Request App

GLYNN COUNTY, Ga.- The Glynn County Board of Commissioners today unveiled their citizen request mobile application (app) for iPhone, iPad and Android phones. Developed by Blue Dot Solutions, the *Glynn Connect* app uses the latest geocaching technology to allow users a fast and easy way to submit work order requests via their mobile device. The app is available for immediate download, free of charge.

Currently, citizens may call customer service or use the Glynn County website to submit their service requests. The *Glynn Connect* mobile app enables users to drop a GPS point detailing the location of their issue, as well as attaching a photograph of the item to accompany their request. Development of the mobile app was spawned by the encouragement of Commission Chairman Mary Hunt and County Administrator Alan Ours; both of whom have seen the popularity of mobile apps growing across the state of Georgia.

"I'm very proud of this mobile app for Glynn County. As part of our vision statement we want to be a leading edge form of government", said Commissioner Hunt. "This is definitely in line with that vision. I'm hoping this will snowball into bigger things for our county and will attract outside business along with the younger generation becoming more interested in local government."

The *Glynn Connect* mobile app is equipped with preset menu selections that allow a service request to be activated in the areas of Mosquito Control, Building & Construction, Garbage & Recycling, Property Maintenance, Street Maintenance and Drainage & Flooding.

For more information, visit the County's website at www.glynncounty.org/app.
