Possible traffic delays for storm drain replacement

GLYNN COUNTY, Ga. – The Glynn County Public Works Department would like to advise the public to anticipate possible traffic delays at the intersection of Kings Way and St. Andrews Dr. on St. Simons Island as a corrugated metal pipe cross drain is replaced with a concrete pipe and inlets are placed to facilitate drainage at the intersection. During construction, traffic on St. Andrews Dr. will be diverted around the immediate area so that the intersection will remain open to traffic to the extent possible. Weather permitting; construction should be completed by the end of next week.
