Tree maintenance in St. Simons Pier Village

GLYNN COUNTY, Ga. – The Glynn County Tree Contractor, Jones Maintenance Company, will be conducting routine tree maintenance in the St. Simons Village area beginning on Thursday, October 15. The scope of work will consist of removing twigs, branches and limbs that have grown low and into the path of pedestrians and bicyclists in order to allow for the safe passage of sidewalk users. Trimming will ensure that pedestrian and vehicle sight vision clearance at intersections is restored and safe. It will include pruning back limbs and branches that have grown into parking spaces, potentially scratching vehicles. Additionally, deadwood will be identified and removed so that it does not fall and hurt people or damage vehicles. Finally, pruning of tree limbs growing into business facades and roofs will provide safe clearance for private property.

This periodic tree maintenance ensures the continued safe growth of the trees in the St. Simons Village area. Work will be conducted under the close supervision of Glynn County Public Works Department. Questions or comments may be directed to Greg Woods with the Public Works Engineering Division. He can be reached at 912-554-7245.
