Glynco Parkway Bridge Realignment

GLYNN COUNTY, Ga.- The contractor for the Glynco Parkway Bridge will tie the new bridge over the Altamaha Canal into the original roadway alignment during the week of March 19-23, 2018. To facilitate this move, temporary base material must be placed on the outside edge of the current by-pass lane to create extra space to allow paver crews to work. This temporary lane will not be paved.

The adjustment lanes will be narrow and indicated with construction barrels. Motorists are encouraged to avoid the construction zone completely during this time. Traffic that does navigate the construction, will be forced to slow down to maneuver in the temporary lanes and delays should be expected.

Once the realignment process is over, the temporary by-pass will be completely removed.

For media inquiries on the project, please contact Engineering Division Manager David Deloach at 912-554-7469.
