Animal Control Intake Resumed

GLYNN COUNTY, Ga. – Glynn County Animal Control will resume intake of new animals on Tuesday, June 26, 2018. After a kitten tested positive for ringworm, precautionary measures were taken on Tuesday, June 12, 2018, in order to treat animals and sanitize the facility. The kitten, and eleven additional animals housed near the kitten, were treated and currently show no signs of infection. The Georgia Department of Agriculture inspected the facility and determined that the shelter was free of ringworm and ready to accept new animals.

All animals at the adoption center are currently available for adoption for a discounted \$25 fee through the end of June.

Media wishing to make further inquiries should contact Animal Control Division Manager Tiffani Hill at 912-554-7500.
