Animal Shelter Cat Intake Temporarily Suspended

GLYNN COUNTY, Ga.- Due to a kitten within the facility testing positive for ringworm, the Glynn County Animal Shelter will temporarily suspend the intake of new cats and kittens beginning Tuesday, October 2, 2018 until further notice. Ringworm is highly contagious and the area suspected of infection must be quarantined and disinfected to prevent the parasite from spreading before new animals can be taken in. As a precaution, other animals that were potentially exposed are being treated for ringworm per the protocol prescribed by the veterinarian providing services to the shelter.

Animals that are currently available for adoption are housed in a separate location and thus not exposed to infection. October is "National Adopt a Shelter Dog" month and all adoptable dogs are available at the reduced price of \$25.

Sanitization of the intake areas of the facility are currently underway. Staff and veterinarians will continue to seek solutions to reopen the shelter for animal intake as quickly as possible.

Media wishing to make further inquiries should contact Animal Control Division Manager Tiffani Hill at 912-554-7500.
