Hurricane Isaias Update #2

GLYNN COUNTY, Ga.- Glynn County is currently under a Coastal Flood Advisory, a Tropical Storm Watch inland and a Hurricane Watch on the coast. A watch means that conditions are right for those threats, but they do not exist at this time. Glynn County is now likely to see impacts later on Sunday, August 2, 2020, as the storm has slowed and shifted slightly to the West.

As the storm passes, shelter in place and stay out of the water. These storms can cause strong rip tides and higher than normal waves. More than one foot of flooding is predicted in areas that typically flood due to storm surge. If you are unsure if you are in a flood prone area, check out the flood maps for your area here: <https://glynncounty.org/1658/Web-Flood-Maps>.

Use this as a reminder to continue to prepare for hurricane season.

- Secure loose or lightweight items outside your house or business.
- Finalize your disaster kit.
- Ensure you have at least 3 days of water and non-perishable foods.
- Ensure you have extra medications and medical supplies.
- If your medication requires refrigeration, ensure you have a plan in place should you lose power for an extended period of time.
- Make sure all information in your family communication plan is up to date and everyone knows the plan.
- Make provisions for your pet. Make sure they are inside, out of the elements, and have plenty of food and water.
- Flooding is possible in low lying areas; Turn Around Don't Drown!

Any potential County or City facility closures for Monday, August 3, 2020 will be determined as the storm approaches. We will continue to monitor conditions and provide updates as needed. Updates will be available at www.glynncounty.org. We advise the public to use the latest forecast models from the National Weather Service Jacksonville.
